

MANAGING INTERNATIONAL RESEARCHER MOBILITY PROJECTS

Campus France is the French national agency for the promotion of higher education and research, international student services, and international mobility. In order to implement the brand-new PRESTIGE programme - targeted at international postdoctoral researcher mobility which is co-financed by the European Union (Marie Curie Actions), Campus France needed an on-top solution to be able to:

- Create a single entry point for all applications
- Generate an efficient database for all projects and documents
- Facilitate easier evaluation of the applications by international experts

HOW DID WE HELP SOLVING ISSUES?

- ✓ All applications are now collected through a **single entry point: a tailor-made online form**. It includes information about every applicants academic and professional career, research project, host institution, etc.
- ✓ **Key information** is available on a **single page**: the host institution, starting date of the project and duration, etc.
- ✓ **All application documents** (CV, declaration of honor, recommendation letters, etc.) are **safely stored**
- ✓ **Systematic personalized emails** are sent to applicants throughout the entire application process
- ✓ A **private form** is sent directly to the international experts in order to facilitate the evaluation process
- ✓ **Each evaluation** submitted can be easily **linked with** the related **application** and vice versa
- ✓ Users can easily access **tailor-made and up-to-date reports** on the number of projects approved, refused, under assessment, etc.

ABOUT OPTIMY

The customer-oriented sponsorship & grant management software which helps sponsorship, partnership, CSR, grants and community investment professionals to improve their performance across the entire lifecycle of a project
